Exercise E1 Electrostatics I

(written test, approx. 8 % of a 120-minute written test, SS2024)

2. What has to be the charge of the plates that create the electric field shown in the picture below? The value of the point charge is $q_0 = 1 \text{ nC}$. Which value needs E_4 to have to get a resulting force of 0 nN on q_0 ?

Path: $q_0 = -1 \text{ nC}$

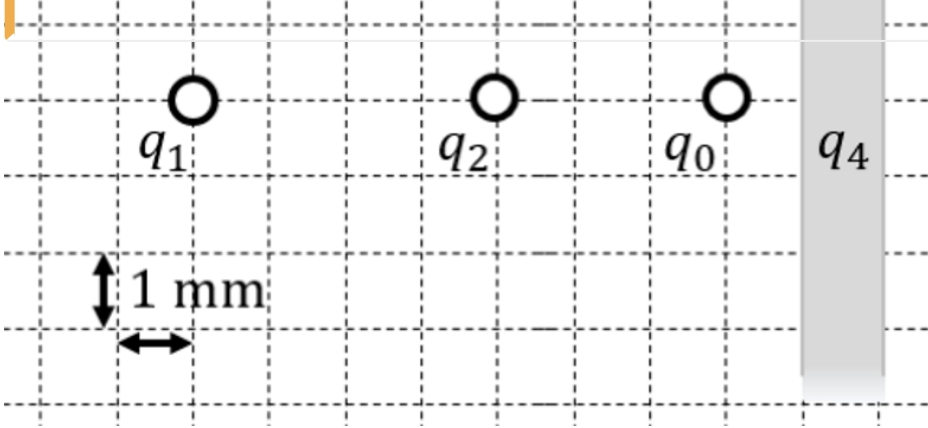

- $q_1 = -5 \text{ nC}$

Path: $E_4 = 907 \text{ (from 1 nN) / q_0}$

- $\vec{F}_{01} = \left(\begin{array}{c} 917 \\ 0 \\ 0 \end{array} \right) \cdot 10^{-6} \text{ N}$

In the x -direction the same force components, we can calculate the resulting magnitude of the force F_{01} by the position $r_{01} = 8.954 \cdot 10^{-12} \text{ m}$ as V/m in the x -direction $F_{01} = \sqrt{\left(\sum_i F_{i,x} \right)^2 + \left(\sum_i F_{i,y} \right)^2}$. Here, the field has to compensate the force \vec{F}_{01} from q_1 and q_0 :

$$\begin{aligned} |\vec{F}_{01}| &= |E_4| \cdot |q_0| \rightarrow E_4 = \frac{|\vec{F}_{01}|}{|q_0|} = \frac{917 \cdot 10^{-6} \text{ N}}{1 \cdot 10^{-9} \text{ C}} = 917 \cdot 10^3 \frac{\text{V}}{\text{m}} = 917 \cdot 10^3 \frac{\text{V}}{\text{m}} \end{aligned}$$

1. Calculate the single forces \vec{F}_{01} , \vec{F}_{02} , \vec{F}_{03} , on the charge q_0 !

Path

First, calculate the magnitude of the forces, like \vec{F}_{01} .
 The force \vec{F}_{01} is purely on the x -axis and therefore equal to $F_{01,x}$.

$$\vec{F}_{01} = F_{01,x} = \frac{1}{4\pi\epsilon_0} \cdot \frac{q_1 \cdot q_0}{r_{01}^2} = \frac{1}{4\pi \cdot 8.854 \cdot 10^{-12} \text{ As/Vm}} \cdot \frac{1 \cdot 10^{-9} \text{ C} \cdot 5 \cdot 10^{-9} \text{ C}}{(7 \cdot 10^{-3} \text{ m})^2} =$$

```

917.\;.\!.\!.\! \cdot 10^{-6} {\rm \{(As)^2 \cdot Vm\}\over{As \cdot m^2}} =
917.\;.\!.\!.\! \cdot 10^{-6} {\rm \{VAs\}\over{m}} = 917.\;.\!.\!.\! \cdot 10^{-6}
{\rm \{Ws\}\over{m}} \quad \&= 917.\;.\!.\!.\! {\rm \mu N} \quad \text{(to the right)}
\end{align*}

```

```

Similarly, we get for  $\vec{F}_{02}$  and  $\vec{F}_{03}$ 
\begin{align*}
\vec{F}_{02} = F_{02,x} \quad \&= -1997.\;.\!.\!.\! {\rm \mu N} \quad \text{(to the right)} \quad \& \\
\vec{F}_{03} = F_{03,y} \quad \&= -1123.\;.\!.\!.\! {\rm \mu N} \quad \text{(to the top)} \quad \& \\
\end{align*}

```
