example for a simplification with the rule for boolean algebra

$$\overline{a \vee (b \wedge (\bar{a} \vee c) \wedge 1) \vee a}$$

At first we will switch the representation to the following:

$$\overline{(a + (b \cdot (a + c) \cdot 1) + a)}$$

so lets start

$$\overline{(a + (b \cdot (a + c) \cdot 1) + a)}$$

1. Put space between the digits

$$\quad$$

$$\begin{array}{l} \begin{array}{l} \begin{array}{l} \overline{(a + (b \cdot (a + c) \cdot 1) + a)} \end{array} \& \\ \color{blue}{\text{Neutral Element}} \quad \quad \quad \& \color{white}{.} \end{array} \\ \end{array}$$
