Non-inverting Operational Amplifier

Op-Amp as current source

An Op-Amp can not only amplify currents and voltages, it can also act itself as current source. Here is an scematic of an typical current source using an Op-Amp:

Fig. 1: Non-inverting Op-Amp: current source

$U_{DD} \approx 10\text{V}$, $U_{SS} \approx -10\text{V}$, $R_1 \approx 100\text{k}\Omega$, $R_2 \approx 10\text{k}\Omega$, $R_3 \approx 100\Omega$

Measure the values given in the table below.

Potentiometer	(U_{R2})	(U_{R3})	(I_{OUT})	(U_{OUT})	(I_{OUT})	(U_{OUT})
0%						
50%		...				

Tab. 1: Op-Amp as current source: measured and calculated values
